The childish Gambino moniker is used as a reference to a 2000 Italian film starring Catherine Deneuve. The performer's discography includes hip hop music with lyrical themes of spiritual, romantic and other moral issues. Gambino was first signed to a record deal with Warner Bros. Records in 2011. However, he was dropped from the label the next year. His debut studio album *Because the Internet* was released in 2013. After the release of the mixtape *Kaufu-Note*, the two-volume mixtape *Donald Glover Introduces Himself* was released in December 2013. Gambino released three mixtapes in 2014: *Because the Internet 2*, *Awaken, My Love!* and *Royalty*. The mixtape *Blow* was released in 2016, followed by three more albums (*Awaken, My Love!* 2, and *America's Cookbook*) in 2017. In 2017, he was featured in the song "This Is America" by Chance the Rapper on *Coloring Book*. Notes References Category:Hip hop discographies Category:Discographies of American artistsQ: How to prove that a power series expansion converges to a function? Let  $f: [0,1] \rightarrow \mathbb{R}$  be a function with  $f(0)=0$ , and suppose there exists a series  $f(x) = \sum_{n=0}^{\infty} a_n x^n$  which converges to  $f(x)$  on  $[0,1]$  with the convergence being uniform on  $[0,1]$ . How can I show that  $a_n \rightarrow 0$  as  $n \rightarrow \infty$ ? I don't know where to start. I'm not allowed to use any inequalities or measure theory. My only tools are Taylor and power series. Any help will be appreciated. A: Since the convergence is uniform on  $[0,1]$ , we can assume that  $a_n$  is decreasing. As you said, by Taylor's theorem,  $f(x) - f(0) = \sum_{n \geq 1} \frac{f^{(n)}(0)}{n!} x^n + o(x^n)$
